The following office action is in response to the amendment after final filed on 12/07/06. The indicated allowability of claims 12-14 and 21 is withdrawn in view of a new interpretation of the prior of record. Furthermore, the amendment filed on 12/07/06 will NOT be entered and the following rejections are based on the amendment filed on 08/16/06.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5, 7, 9-12, 14-17, and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Voorhis in view of Pembridge U.S. Patent 3,199,867.

Van Voorhis disclosed a toy comprising a shaft (1); a roller (2) attached to a first end of the shaft; the roller (2) is capable of being interchangeable via (3); a housing (5) attached to a second opposing end of the shaft; a front end (horse's mouth) coupled to the housing; a sound pad (8) coupled to the housing; the roller comprising at least one wheel (2) and an axle (3); at least one decorative member (strap) coupled to the housing. It is noted that Van Voorhis failed to specifically teach decorative member being coupled to the housing as being interchangeable and to resemble a jet, an automobile, and a wing as set forth in these claims. However, Pembridge disclosed a riding game device having at least one interchangeable decorative member (3), and other members resembling a plane (5) or a boat (4) as shown in Fig. 4. Accordingly, it

Art Unit: 3711

would have been obvious to one of ordinary skill in the art to modify the housing of Van Voorhis with a plurality of interchangeable decorative members to provide different looks for accommodating different users.

Regarding claims 14 and 15, the disclosure of Van Voorhis and Pembridge, and the above explanation would constitute the steps as recited.

Regarding claims 16, 17, 19, and 21, it would have been a matter of design choice to modify the rollers (2) of Van Voorhis to accommodate the specific housing such as an airplane, a boat, or a rocket.

Claims 4, 8, 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Voorhis modified by Pembridge as applied to claim 1 above, and further in view of Thornell.

It is noted that the combination of Van Voorhis and Pembridge failed to teach the use of a light pad coupled to the housing as set forth in claim 4; and a handle coupled to the housing as set forth in claims 8 and 13. However, Thornell disclosed a rocking toy comprising a light pad (7) coupled to the housing (6) of the toy, and a handle (curved handle as shown in Fig. 1). Therefore, it would have been obvious to one of ordinary skill in the art to modify the housing (5) of Van Voorhis as modified by Pembridge with the light pad (7) and the handle as taught by Thornell for the purpose of attracting attention of the user and controlling the head of the horse with ease.
